Professional Summary

I'm a full-stack software developer with experience building scalable and robust .NET/C# applications and using Azure cloud services and API integrations to optimize business processes and address integration challenges.

Authorized to work in the US for any employer

Work Experience

Software Developer

Hynes and Khater-Houston, TX
June 2022 to August 2025

- Mentored new and entry-level developers in C# and API development, conducting code reviews and providing actionable feedback to enhance team onboarding and code quality.
- Automated backend services in .NET 8 to aggregate and synchronize sensitive data from multiple third-party APIs, ensuring secure and efficient data delivery.
- Built responsive, modular front-end components for web apps using Blazor, collaborating with UI/UX and product teams to implement dynamic web features based on Figma designs.
- Collaborated in an Agile Scrum team to deliver scalable C# API endpoints for high-traffic web applications, consistently meeting sprint deadlines and improving performance.
- Built and maintained REST API integrations with third-party applications in .NET, ensuring seamless data flow and interoperability to address business integration needs.
- Utilized Azure Service Bus and Azure DevOps to deploy scalable .NET API solutions and automate CI/CD pipelines, improving system reliability and deployment efficiency.
- Designed and implemented .NET features using OOP and design patterns (Factory, Repository, Mediator), enhancing code maintainability and scalability.

Software Developer

Alliant Group-Houston, TX
January 2022 to June 2022

- Collaborated with clients to gather and refine requirements, delivering full-stack solutions using C# and MSSQL for web and backend development.
- Troubleshooted and resolved bugs in production environments, ensuring minimal disruption to client operations.
- Coordinated with team members to manage story assignments and track progress through Jira.
- Developed front-end and back-end solutions using C# and MSSQL, delivering key updates for clients.
- Facilitated knowledge transfer to QA teams to ensure thorough testing and seamless releases.
