Daniel Arwe

Building Applications from Frontend to Backend | Software Developer | BuildOn Technologies | .NET, C#, SQL Server, SPAs, TypeScript, JavaScript and more...

Greater Houston

Summary

Well-versed in the C# and the .NET ecosystem, as well as multiple other application development tools and technologies, with experience delivering robust, maintainable code, and playing key roles in requirements gathering, product design, estimating, and sprint planning. Adherence to industry standards, like SOLID and unit testing, has served clients well and earned me a reputation as a reliable and skilled developer. Well-rounded in both frontend and backend technologies, including single-page applications, I'm comfortable working on any part of the stack and enjoy taking on new challenges to deliver excellent solutions for clients.

Experience

BuildOn Technologies

Software Developer

June 2023 - Present (3 years)

Houston, Texas, United States

Entrance Consulting

Software Developer & Consultant

July 2018 - June 2023 (5 years)

Houston, Texas Area

- Led and supported custom development projects, including software maintenance, planning, and recommendations to optimize efficiency and cost-effectiveness.

- Increased maintenance client's confidence, through effective communication and consistent results, leading them to double contracted monthly maintenance hours.

- Secured three additional projects from an existing client by delivering on-time, quality code and managed those projects from requirements gathering to release.
- Conducted meetings with key stakeholders, gathering requirements, building user flows and wireframing UIs, to refine user requirements and project estimates.
- Developed new features, debugged existing code, and ensured adequate code coverage by building in unit testing.
- Utilized frontend and backend tools to build desktop, mobile, and web applications, participating in multiple phases of the application lifecycle.
- Automated creation and configuration of multiple SharePoint Online sites for a client, leveraging PowerShell to reduce per-site build time by 90%.

Self Employed

Math Tutor

August 2011 - August 2019 (8 years 1 month)

Houston, Texas Area

- Provided private and group instruction to struggling students from 6th grade math through Pre-Calculus, developing customized learning strategies.

Fort Bend ISD

Secondary Mathematics Teacher

August 2011 - August 2014 (3 years 1 month)

Sugar Land, TX

- Taught secondary math in a general education and honors classroom, assessing student learning, ensuring adherence to state standards and objectives, communicating with parents, and providing additional support as needed.
- Collaborated with parents, keeping them apprised of students' progress and concerns
 - Implemented additional tutorials, outside of school hours, to provide additional support
