Joseph Arellano

Veo Indago Lead Software Developer at BuildOn Technologies
Richmond, Texas, United States

Summary

John D. Rockefeller once said, "I do not think there is any other quality so essential to success of any kind as the quality of perseverance. It overcomes almost everything, even nature."

These words would begin to ring true at the ripe age of 15. At the time my parents found it necessary to restrict my internet access by relocating the family computer to the furthest corner of the house, away from the nearest telephone jack. However, they would soon find out their efforts were futile as I engineered a solution of hastily spliced telephone cords.

Today, perseverance is still a big part of who I am, but it has also been joined by: integrity, passion, engagement, and a willingness to learn new and exciting things.

I have become a leader, coach, and mentor to others. I have experience adversity and have come out on top. I am making my dreams a reality one step and one day at a time.

Experience

BuildOn Technologies

Lead Software Developer

June 2021 - Present (5 years)

Houston, Texas, United States

Key Achievements:

- Led the migration of our application from .NET Framework to .NET Core, significantly enhancing system performance and scalability.
- Skill Adaptation and Application: Acquired and applied knowledge in EF Framework and EF Core, successfully overseeing the migration from EF Framework to EF Core 3.1, and later to EF Core 7.
- Architectural Leadership: Spearheaded the design and architecture of new application features, contributing significantly to the strategic evolution of our software.

- **Strategic Impact on Product Development:** My contributions have enhanced specific features and paved the way for more modular and scalable product development, aligning with the long-term goals of Buildon Technologies.
- **Collaborative Agile Teamwork:** Worked closely with the Agile team, including UI/UX and QA, to deliver quality enhancements within each sprint. Actively voiced concerns and suggestions to ensure the highest standards of product quality.
- **Mentorship and Team Collaboration:** Conducted comprehensive code reviews and mentored junior developers, promoting a collaborative and skill-enhancing work environment.

Professional Growth:

- Transitioned from a freelance/Hobbyist background to a full-time professional role, rapidly adapting to and excelling in an agile professional environment to deliver timely and exceptional software.
- Continuously expanded technical skillset, adapting to new frameworks and technologies as required by project needs.

Entrepreneur-Web Development

Freelance Front End Web Developer

January 2018 - Present (8 years 5 months)

Houston, Texas Area

Worked with clients to create and update existing websites by using HTML5, CSS, and Javascript.

212box

Software Developer

February 2020 - July 2020 (6 months)

Houston, Texas, United States

I was tasked to develop a hardware and software solution in order to allow a Microsoft Surface to remotely control an automated closet.

However due to COVID-19 the project was cancelled and only the Design Phase completed.

Project Overview

The purpose of this proposal is to design and develop a windows application that will allow

users to interact with the Automated Closet System. The user will be able to take a picture of

the item with the application and place it on the conveyor. The item can then be recalled with the application upon user selection.

Scope of Services

1. Design and development of a functional UI through the creation of use cases and mock-ups. The application UI should be intuitive and easy to navigate.

2. Design and development of a windows 10 application that will run on the Microsoft Surface X that will communicate and interface with the conveyor system.

3. Implementation and configuration of the application by installing on end user device.

As well as testing to ensure application functions and operates the Automated Closet

System as specified in the project overview.

4. Implementation of the wireless connection between the Surface and the conveyor

based on the RS232 standard. A serial to wifi adapter will be connected to conveyor

system via a serial cable and allow wireless communication between the two devices.

5. Support of the application for up to a year after project completion addressing and

fixing any unforeseen issues caused by any flaw in the original software programming.

Senior Capstone Project

Project Manager

August 2017 - December 2017 (5 months)

Houston, Texas Area

As the Project Manager I gained valuable experience in the Software Development Life Cycle as my team relied heavily on my direction. It was my responsibility to assign tasks and ensure the completion of deliverables on time.

It was also my duty to ensure the successful completion of the project by stepping out of my role and gain valuable experience in database design and software solutions.

University of Houston-Downtown

Student

January 2016 - December 2017 (2 years)

Houston, Texas Area

As a working professional I attended the University of Houston-Downtown and completed my final two years. I made the Dean's list twice in the Spring of 2016 and 2017.

During my final semester I decided to resign my position at AMC Theatres so I could focus on my school work and Capstone Project.

AMC Theatres

General Manager

December 2016 - September 2017 (10 months)

Houston, Texas Area

I joined AMC Theatres when the company merged with Carmike Cinemas. During this time of tremendous change it was my responsibility to prepare and train my staff on the new changes and processes.

As a champion of change I oversaw the changeover of new computer systems, operational duties, and company organization. I also gained valuable experience in several ERP solutions such as Kronos and OBI.

Carmike Cinemas

Managing Director

May 2009 - December 2016 (7 years 8 months)

Houston, Texas Area

I was accountable for ensuring guests returned to my facility by promoting exceptional customer service through hiring, coaching, and maintaining a clean and safe environment. I also maximized profitability by analyzing trends, creating action plans, and controlling variable costs. I was also utilized as a resource to aid in system changeovers and act as a company liaison when Carmike Cinemas purchased other theater locations.

By using data analysis I was able to bring new products to my location that aided in increasing my per capita per person year over year. After being assigned to a declining location I was able to reduce customer concerns by over 90% and improve the profitability of the location. Which resulted in earning the most improved EBITDA in 2015 and a Manager of the Year nomination.

Pizza Hut

General Manager

2006 - 2009 (3 years)

Azle, TX

As a crew member at Pizza Hut I was able to rise to become a General Manager at a dine-in low grossing location. During my time at this location I oversaw record setting sales and the implementation of the delivery service. My success at this location resulted in the promotion to one of the highest grossing Pizza Hut restaurants at the time.

Education

University of Houston-Downtown

Bachelor of Business Administration - BBA, Management Information Systems,
General · (2016 - 2017)

Stephen F. Austin State University

Accounting · (1999 - 2012)
